Weekly Review

Of the Canned Goods Situation. Market Reports.
Conditions and Changes. Outlook.

The weather during the past week has shown considerable variation in different parts of the country. Unusual and extraordinary heat was had in the far northwestern states, and on the Pacific Coast, whilst on the Atlantic Coast unusual precipitation has occured from New England to Florida, ranged along the Gulf States and has exhausted itself in the upper Missouri valley. In general however the Government reports say whilst the weather has not been favorable to growing, it has served very well for the harvesting of the staple crops. The season however at present is advancing steadily in the development of all canners' products.

Sugar corn on the basis of about a 40% crop is developing fairly well; peas as a crop for this year are nearing an end; small fruits are progressing fairly well in such things as blackberries, raspberries, gooseberries and the like. In California apricots will be nothing more than about 20% of a full crop; peaches in that State are now beginning to come to market, but it is reported few of them will be freighted East in their natural condition In Maryland and the Chesapeake region there will be secured quite a large and fine crop of peaches; Georgia is now in the middle of her peach crop, and this report of the fruit crops will account for all.

The weather so far has been favorably to tomato plants in all sections and whilst the fruit is beginning to show up upon plants it will yet be some weeks before they begin to make good returns. In all the local markets new tomatoes are bringing high prices, and the packers will not get hold of any of then before the first of August in any quantity to start upon them in the canning houses. We will therefore witness a concentration of the best efforts of the canners during August upon the three articles, corn, peaches and tomatoes.

In the canned goods market brokers report few changes. There have been some slight variations in the value of canned small fruits, a decline in the values of blackberries is quoted in these reports; the figures being placed at 57½ to 60c., as against 60 to 65c. last week. Gooseberries also show a decline of 2½c.

upon last week's quotations, and are offered now at 80c. to 85c. Red raspberries hold their quotations of 75c. to 80c. and black-raspberries are quoted at 70c. to 75c., last week's figures being 75c. to 80c. Red cherries are also marked about 5c. lower, and are offered at 60c. to 65c.; white are quoted at $1.00 to $1.10, and extra white at $1.25 to $1.30.

There is no change reported whatever in the quotations of corn, local or otherwise. Evergreen standard corn is held at 55c., standard shoepeg at 60c.; and country packed Maine style at 55c. There has been a further small advance in the quotations of cove oysters, 5oz. are quoted at 80c. to 85c., virtually an advance of 5c., 4 oz. are held at 77½c.; 8 oz. at $1.50 and 10 oz. at $1.60. At this season of the year however the market for cove oysters is usually quite and this continued quiet advance in values, gives the surest evidence that we will have a strong market well held in the fall.

Peaches hold their own firmly at the present time. No. 3 standard white are quoted at $1.50 and yellow at the same figure; No. 2 yellow $1.15, and white $1.20; extra yellow are quoted at $1.75; No. 3 pies, peeled, are $1.15; gallon pie, unpeeled, is held at $2.60. Unpeeled peaches are very scarce in this market, but the new fruit will soon be coming to this port.

Peas are rather firm but a quiet market, showing no change in the quotations. Early June standards are quoted at 90c. to $1.00; sifted, $1.00 to $1.10. extra sifted at $1.20 to $1.25; extra fine sifted, $1.45 to $1.50; petit pois, $1.75 to $2.20; early June seconds are offering at 85c.; sifted at 90c. Marrowfat peas seem to be nearly out of quotation in this market.

Pineapple holds its value without change. Standard No. 2, not E. & C., 90c.; E. & C., $1.00; extras, $1.30; extra fancy grated, $1.75; No. 3 pie, in water, 65c.; in syrup, 70c.; gallon pie grated, in water, $1.80; in syrup, $1.90.

The flurry in tomatoes of recent date has apparently passed over, and yet the banks' quotation of 95c. has not been sustained. No. 3 standard tomatoes have been selling during the past few days at 90c. to 95c.; extras at 95c.; No. 3 fair at 90c.; No. 3 seconds at 85c.; No. 2 standards at 70c., and county brands at the same figure. Gallon standards are quoted at $3.15 in this market. There is unquestionably a light pack of tomatoes in prospect, but August will probably change this outlook. It is a matter to be considered, however, that a considerable quantity of peaches, corn and other things which will invade the canning houses will undoubtedly deflect attention from tomato packing to the extent it would otherwise get.

All hands are interested now in getting assurance that they will be able to obtain a full supply of cans during the month of August, when in a large measure the canners' season's pack will be put up during this month and September. The cold rains of the past week have unquestionably still further retarded the ripening of the tomatoes, but the heat of the sun is sufficient to force these to maturity in time. Nevertheless, as nearly all other articles have also been delayed, pretty nearly all the enforced neglect will fall upon tomatoes, because we feel assured that the great canneries will give their best attention to peaches in a season of first-class stock such as we have not had for five or six years.

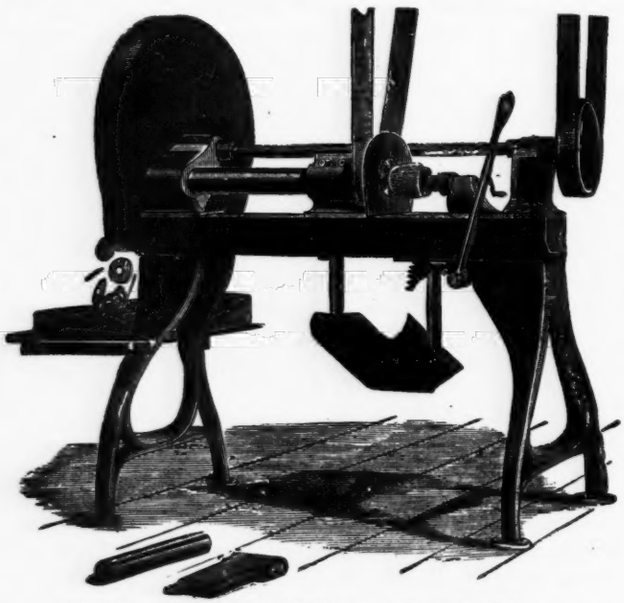
There is no change to record in the manufacturers' prices of cans, which remain at figures previously given. There is, however, a change this week in the quotations of pig tin, which shows an advance of about $1.00 per ton in value. The present quotations are $37.75 to $38.25, as against last week's figures of $36.75 to $37.00. Lead also remains unchanged this week, and the variation in pig tin is thus the only change in canners' metals which we have to record. They may be found on their regular page.

The Sinclair-Scott Co., Baltimore, make the Cyclone Pulp Machine.

George W. Zastrow,

MECHANICAL ENGINEER,

1404 to 1410 Thames St., Baltimore, Md.



Zastrow's Patent Pineapple Machine.

This machine has recently been put upon the market, and has proven a perfect success. It not only does more work than any other machine of its kind in use, but turns out a better and more marketable article. It is the only machine of its kind that produces a finished slice that will go into a can-hole without breaking. It cores the apple and withdraws the core, splits the apple half through the diameter, sizes it to required diameter to suit the can, and slices it to suitable thickness before leaving the machine. The capacity of the machine with one man and a boy to operate it is from 5,000 to 7,000, and with the use of an additional man will do from 7,000 to 12,000 per day.

We also manufacture a Pineapple Corer, which cores accurety, to work in conjunction with above machine. These machines will also segment the apple into two, three and six sections, and slice these sections if desired.

THE GRASSELLI CHEMICAL CO.

CLEVELAND, OHIO.

New York Market

Reported by Special Correspondent. Market Conditions, Changes and Outlook.

NEW YORK, July 11.—With everybody in New York who possibly can anxious to get away, trade is more or less quiet in lines of food stuffs. Possibly it is made up in larger demand from the resorts to which the vacationists go, though the theory is that all food stuffs used at such resorts are fresh. Perhaps it doesn't matter particularly. Many lines are largely exhausted and any considerable buying would create a good deal of difficuly. The situation is, therefore, substantially as it has been for several weeks and, while prices are reasonably firm, movement is relatively light. On most lines, however, holders are firm and will not concede anything in the way of price, even though it might largely increase the business.

Tomatoes.—Taking the week through, the tone of the market has been easy on tomatoes and offerings of new pack for last half of July delivery have been made at 90c. delivered for full standard Maryland 3s. Buyers, in view of the near approach of the new pack and the liberal purchases previously made for future delivery on the basis of 75c. to 77½c. f. o. b. Baltimore, are not disposed to buy old goods, excepting as stock is actually needed. The tendency on old stocks is lower and quotations of 97½c. delivered here on syndicate goods have been common. Some offerings have been made at 95c. from second hands. Packers are quoting 90c. on new goods to be delivered July 20 and are guaranteeing the date. The market for future standard Maryland 3s is 75c. f. o. b. Baltimore season's delivery option of the packer. No interest is shown in 2s at 70c. f. o. b. Baltimore, but holders refuse to meet the lower views of holders. Rumors have been current during the week that banks holding syndicate stock as collateral were disposed to unload, and, while nothing has been offered below 97½c. delivered, the rumors have had a more or less unsettling influence on the market.

Peas.—The market is very strong and a fair business for local account is being done. Reports from State canning centers say that some packers are short on contract sales. Western peas are firm and movement is restricted.

Corn.—The market is stronger and on Maine fancy the tendency is sharply upward. Advices from packing centers are that heavy rains have retarded growth and unless the weather changes to dry before long the yield will be greatly reduced. Some packers have withdrawn from the market. Southern Maine style is firmer, with 55c. to 57½c. f. o. b. factory quoted on futures and 55c. on spot. Western grades are steady, but movement is somewhat restricted.

Asparagus.—The market is firm, with the product of fine quality, and new-packed goods are going into jobbers' hands with considerable freedom.

Beans.—The market is firm, but movement is rather slow. Holders are not anxious to sell, and buyers do not take hold freely.

Salmon.—Pink grades continue firm, with considerable inquiry reported from interior points. Few lots are offered under 95c. here. Red Alaska is firm under increased jobbing demand. Reports from the Columbia River show that the pack of chinook continues light.

Sardines.—The market has a sharp upward tendency under light packing prospects. Quotations are $2.60 on Continental key cans and $2.50 on quarter-oils f. o. b. Eastport. Many orders and inquiries are reported for future delivery, but, according to reports, packers are unwilling to book orders in advance

of the pack. Up to date the pack is 300,000 cases short of what it was last year at the same time. No run of importance is expected before August 15. Southern jobbers are coming into the market more freely and it looks now as though by the time the heavy pack begins there will be no goods left. Packers are this year endeavoring to establish a reputation for grade and are packing only the best.

Fruits.—The trade is still waiting for the announcement of opening prices by the California Fruit Canneries Company. It is pretty generally understood that the 1906 prices will be higher than they were last year. How much higher is a matter for conjecture. The J. K. Armsby Company announced opening prices this week on a number of varieties of fruits. Following are the figures as given out:

	2½-lb. Extras.	2½-lb. ex. Stand'ds.	2½-lb. Stand'ds.
Apricots	$1 85	$1 55	$1 45
Cherries, white	2 50	2 25	2 10
Cherries, black	2 50	2 25	2 10
Peaches, yellow free	1 70	1 45	1 35
Peaches, Lemon Cling	1 95	1 70	1 55
Peaches, L. C. sliced	1 95	1 70	1 55
Peaches, White Heath	1 95	1 70	1 55
Peaches, W. H. sliced	1 95	1 70	1 55
Pears, Bartlett	1 90	1 65	1 50
Plums, Green Gage	1 35	1 15	1 05
Plums, Gold Drop	1 35	1 15	1 05
Plums, Egg	1 35	1 15	1 05
Grapes, Muscat	1 35	1 15	1 05
Cherries, Royal Anne	2 50	2 25	.....
	2½-lb. Seconds.	2½-lb. Water.	Gallon Pie.
Apricots	$1 35	$1 25	$3 00
Cherries, white	1 85	1 70	3 50
Cherries, black	1 85	1 70	3 50
Peaches, yellow free	1 25	1 15	3 00
Peaches, Lemon Cling	1 40	1 30	.....
Peaches, White Heath	1 40	1 30	.....
Pears, Bartlett	1 35	1 20	2 25
Plums, Green Gage	95	90	2 25
Plums, Gold Drop	95	90	2 25
Plums, Egg	95	90	2 25
Grapes, Muscat	95	90	2 25

Prices are f. o. b. common shipping point California.

The list shows some very decided changes as compared with last year. Apricots are 35c. higher on extras and 25c. on extra standards, standards and seconds. Cherries are 50c. lower on extras and 15c. on standards. Yellow free peaches, 2½ standards, are the same as last year, extra standards are 5c. and standards and seconds 10c. higher. Lemon cling peaches are 10c. higher on extras and extra standards, with standards and seconds 20c. higher.

HUDSON.

CROP CORRESPONDENCE.

Indications of a Full Crop.

DELAWARE CITY, DEL., July 12, 1906.

THE TRADE: The general crop condition is favorable, both for tomatoes and corn, and at the present time have indications of a full crop.

Yours respectfully, C. W. PANCOAST.

Corn 60%; Tomatoes 75%.

DENTON, MD., July 9, 1906.

THE TRADE: Packing, as we do, peas, corn and tomatoes, we can report on peas a crop of only 40% of the average size. Corn prospects at present do not indicate more than 60% of the usual, and the yield of tomatoes we do not expect to see reach over 75%.

In a word, crop conditions are poor for corn and tomatoes. Especially is this true of corn. We are paying $9 for tomatoes, and we believe about the same number of factories will operate as in former years.

Yours truly, GEO. T. REDDEN.

One-Half Corn, Double on Tomatoes.

ODESSA, DEL., June 29, 1906.

THE TRADE: Corn and tomatoes make up the pack of our section. On corn the acreage this season is not more than half what it was in 1905, but on tomatoes there is double the acreage out this year, and at present the prospects seem to be very good for full crop yields. Only about half the number of factories will work upon corn this year that did last, while all of them will put in work upon tomatoes.

We are paying $8 to $9 per ton for tomatoes and $7.50 for corn.

Sincerely yours, WATKINS PACKING CO.

IF YOU DON'T BUY OF US, WE BOTH LOSE MONEY.

Jobbers' Views

Conditions as Observed by Leading Grocer Journals of Various Sections and Their Comments.

New York.

The drop in tomatoes, it appears, was caused by the banks becoming tired and realizing on their loans on tomatoes by throwing blocks of goods into the market. The decline in value was spectacular, amounting to 25c. a dozen, bringing the value of No. 3 Maryland tomatoes down to 85c. a dozen. It would seem that the money lenders grew afraid as the opening of the packing season drew near, but apparently they have got over their fright and holders are now asking the equivalent of 97½c. delivered in New York. The demand is not large. Peas and corn are in good shape. The market for the former is firm at Baltimore and supplies there are small. In this State packers are trying to cancel their contracts. Corn is strong for future delivery. The packers are prorating orders in this State. In first hands corn stocks seem to be working down well towards the bottom, but the second-hand and third-hand supply is probably abundant. California asparagus will be delivered according to a table of percentages this year, ranging from 2% to 4% for large and mammoth white, 2½-lb. tall cylinders, to full amount on large and mammoth peeled green and gallon soup tips. In fruits there is no change of importance to report. Gallon apples on spot are easier at $3.25. In Baltimore peaches are selling fairly. The prices of California new packed fruits are likely to open high, especially for apricots and peaches and perhaps pears.—*Merchants' Review.*

Philadelphia.

The new banking pool has, up to the present time, succeeded in holding tomatoes at 95c. The chance is that the market will not go higher. Doubtless the syndicate can maintain prices where they are if it chooses, but it remains to be seen whether it will choose to, for, if the goods fail to move at present prices, in all probability a price will be put on them that will move them. The demand is very light and the season grows late. Futures have weakened somewhat since the spot collapse, and some sales have been reported at 75c. Nominally, however, the market is 77½c. Corn is dull, but fairly firm on spot. Futures are quiet, as many packers are about sold up. Peas are unchanged, with an active demand for anything below the list. Such goods are scarce, however. Nothing new has developed in peaches, except that Baltimore brokers are now generally offering future goods on the basis of $1.10 for second yellows. The demand for spot peaches is scarce. No prices have as yet been named for new California canned goods, as the packers and growers of peaches have not yet been able to get together on price. The Baltimore packing season is progressing and string beans are gradually declining. The latest quotation was 52½c., and they will doubtless go a little lower. Apples are now strong at $3.75 for gallons, with three-pounds out of the market. Futures are strong. —*Grocery World.*

Chicago.

Peas and corn are attracting increasing attention from wholesalers and retailers both. Corn is steadily improving in price and the pack of peas, as a whole, is so short that this article has become one of the strongest in the whole list of canned goods. In some of the most important canning States the pea pack was less than 50% of what was expected. Market is extremely strong. Corn acreage is reported heavily reduced this year, and the demand during the winter and spring told on spot stocks, both these features making a strengthening market. Future tomatoes are firm, with few packers willing to make more sales; but spot goods, old pack, are irregular now in the East. String beans are firm. A feature of the canned goods market is the reports coming from Baltimore and other points telling of the disappointingly small production of the various canned berries. Practically all kinds fell below normal by a wide margin. The varieties include strawberries, raspberries, blackberries. Canned peaches, both 1905 and 1906 packs, are very firm. California reports are strong. Peaches are a safe and good purchase at prevailing prices. Canned fish of all descriptions is firm. The salmon market shows a strongly advancing tendency. Sardines are strengthening and cove oysters are firm.—*Grocers' Criterion.*

Montreal, Can.

Since last report there has been a decline of ten cents in the price of tomatoes. Dealers are now asking $1.20 per dozen. This decline, mentioned as probable in *The Grocer* some two weeks ago, has been caused by the desire of holders to dispose of such stocks as they held before the new crop shipments began to arrive. No quotations have been yet received for the coming season. It is not thought, however, that there will be many changes in prices. Peas are considered as certain to be advanced, since the price last year was too low. Other lines of canned goods are expected to be about the same. Present business is about steady.

HAYNER CORN SILKER

MANUFACTURED ONLY BY

AYARS MACHINE COMPANY,

SALEM, NEW JERSEY.

BROWN, BOGGS CO., Ltd., Hamilton, Ont., Sole Agents for Canada.

Toronto, Can.

There is nothing new in canned goods. Green fruits are largely taking their place and the consumptive demand is not large, but stocks are not heavy and prices on this account are firm. Eastern reports speak of a drop in tomatoes, but Toronto wholesalers are finding the usual sales at the same prices. Salmon are firm at the recent advance and in active demand. Canned meats are quiet.—*Canadian Grocer.*

London, England.

Salmon.—There is no change to note in this market, but the tone remains quiet. Lobsters are without alteration. The London City has brought 4,484 cases and the Ivernia 1,680 cases, both to Liverpool. Sardines are a quiet market, but prices remain steady. Reports from Portugal state that only a few fish suitable for export purposes are being caught. No better reports are to hand of the fishing in France. The Pelayo has arrived with 3,100 cases, the Malaga with 2,832 cases and the Bravo with 611 cases and the Bohemian with 500 cases, the last two named to Liverpool. Fruits are in fair consumptive demand, and the market is steady. Pines are firmer and there is a better inquiry on the spot, whilst packers are asking more money forward. The Manila has brought 1,470 cases and the Bellerophon 1,985 cases pines. Meats are unchanged, but the market remains quiet.

Liverpool, England.

Salmon.—The market continues steady in price, with a good inquiry, and the prospects are that there will be a very large demand for this article during the next month or so. Lobsters very firm and in good request. Sardines in good demand and rather firm in price. Californian Fruits.—The demand for these continues at recent limits, with the exception of apricots, which are fetching slightly higher prices. Pineapples are selling more freely and quotations are slightly firmer. For forward shipment, cables just to hand intimate that preservers will not contract at prices ruling earlier on in the week.—Meats.—Although the demand has been somewhat curtailed, prices are unchanged.—*Grocers' Gazette.*

Baltimore Canneries Investigated.

Owing to the investigations into the meat packing interests of Chicago and the consequent notoriety, some parties thought it might be well to look into the conditions of the fruit and vegetable canning factories in Baltimore. Following this idea, they applied for admittance to these factories, were granted it and in letters to the Baltimore Sun have given their impressions of them. We give them herewith:

FRUIT AND VEGETABLE CANNERIES.

Messrs. Editors:

I have been reading the government exposures of meat-packing houses in Chicago, and, as my practice is largely in Canton, I was curious to learn something of the condition of the fruit canneries, a large number of which are located there. Recently I gained admittance to the plant operated by H. J. McGrath & Co. The greatest of my surprises on visiting this establishment was its absolute cleanliness, the floors in the working-room being of concrete, making the cleaning of them an easy task; the light was fully ample and the appearance of the working people is good. At the time I paid this visit they were engaged in packing peas, and the operation was explained to me and was a complete revelation. The peas are hardly handled by human hands, as most of the work is done by machinery. They are hulled, separated, washed, packed in cans and capped entirely by machines, and I remarked to one of their men that from now on I can eat canned peas with full relish.

My object in writing you this letter is purely in the interest of justice, as such exposure as has been made of the Chicago packing interests is apt to reflect on fruit and vegetable canneries unjustly. In the interest of fair play, I ask that you publish this letter. DR. W. L. BURKE.

Messrs. Editors:

I have read with great pleasure the letter of Dr. Burke, giving an account of his visit to the packing houses of this city and his indorsement of their thorough cleanliness. I have had a similar experience in a recent visit to the cannery of J. S. Farren & Co., where my preconceived prejudice against all canned goods was at once removed. Cherries, strawberries and peas were being packed by white men and women, whose personal cleanliness and the character of their surroundings were beyound criticism. Most of the work was done by machinery and is almost automatic, the human hands scarcely, if ever, touching any of the products. I have seldom, or never, tasted any canned goods, owing to my deep-seated prejudice, but I shall not hesitate in the future. And in the days of the muckraker I consider it the duty of all who possess the knowledge to speak the truth. JOHN F. HUNTER.

TO THE CANNING TRADE:

We are turning out the CLEANEST, STRONGEST and altogether the MOST ATTRACTIVE CAN there has ever been offered to the Trade.

We use only the best raw materials at all times, because we believe that in the long run the best goods are the cheapest.

Our shipping facilities are unsurpassed by any other manufacturer. Our plants are surrounded by railroad tracks and switches on our own property, which enables us to guarantee quick and satisfactory shipments at all times. This feature, next to making a strictly high grade Can, is the most important consideration from a Packer's standpoint. We believe we combine both of these features to the highest possible degree.

If you have not used any of our Cans, ask your neighbor about them, or, better still try our Cans yourself. You will really be supprised at the superiority of the "CONTINENTAL CAN" over any other that may be offered you. If you will address your inquiry to either of our offices, you will receive prompt and courteous attention.

Awaiting your commands, we remain,

Yours very truly,

CONTINENTAL CAN COMPANY

T. G. CRANWELL, President.

The Peach Outlook.

The Pennsylvania Railroad has completed its official estimate of the peach and pear yield of Delaware this year. The estimate is based upon data compiled by Isaac W. Mills, formerly superintendent of the Delaware Railroad, assisted by all the station agents of the road. The crop is now nearly ready for shipment and the Pennsylvania Railroad estimates that it will move 2,560,995 baskets of peaches and 499,253 baskets of pears from the State of Delaware during the next three months.

Mr. Mills has made a study of the Delaware peach crop for a number of years. His estimates are never made until after the June drop. This drop is now over and the time has arrived when experts have a chance to figure with some degree of accuracy. This information is secured for the purpose of giving the railroad an opportunity to prepare equipment for handling the fruit. This yield will be one of the largest in the history of the State and the peach growers throughout the State are already making preparations to handle heavy shipments.

These figures indicate that the yield will be 200% greater than last year and 100% greater than any year within the last decade.

A Philadelphia advice says: One thousand cars are being prepared at the car shops of the Pennsylvania Railroad here and in the various yards of the company for use in handling the Delaware peach crop. Spraying has had good effect upon the Delaware peach orchards in preventing the San Jose scale and this year promises to be a banner year for the Delaware peach grower.

A special report to the *Fruit and Produce Record* from Delaware reads: Peach growers are becoming alarmed at the havoc being wrought in the orchards of Kent and Queen Anne's counties by the premature ripening of the fruit. Mountain Rose peaches, which ordinarily will not ripen till August, are already fit for shipment, but are left to rot. This prematuring of fruit is the forerunner of the yellows, which some years ago nearly devastated every orchard on this peninsula.

Other sections report as follows:

MILFORD, DEL., July 10.—This seaspn's peach crop will be the largest since 1893, if not the largest ever grown in this section.

Leo O. Truitt, a prominent shipper, estimates the probable shipment from Milford depot at 100,000 baskets; by boat, 60,000; from Lincoln, 70,000.

The early fruit is now coming in, but the season proper will open about July 29 with the Mountain Rose variety. Prices will average 40c. to 50c. per basket, and the fruit promises to be excellent.

DOVER, DEL., July 10.—Outlook for the peach crop in lower Delaware this year is the best known for many years.

While a few farmers reaped a harvest last year by having a thousand or more baskets, this year many farmers and fruit growers have placed their estimates anywhere at from 8,000 to 10,000 baskets.

The prevailing varieties are the Elberta, Bell of Georgia and Reeves Favorite. In almost every instance where there are large orchards the yield will be exceedingly heavy.

SEAFORD, DEL., July 10.—Conservative estimates place the yield in this locality at one-third to one-half a crop. A few white peaches are being brought into market and fair prices are being realized.

Elberta, the peach center in Sussex county, will yield heavily, and farmers look for fancy prices for this famous peach. Few foreign buyers are here, but they are expected in a few days, when prices are expected to rise high. Refrigerator companies are making extra efforts to handle the crop.

DELAWARE CITY, DEL., July 10.—Peach growers in this locality predict an unusually large peach crop. Harry Lester, on the Mark Cleaver farm, between here and New Castle, where the largest orchard in the vicinity is situated, looks for an exceptionally large crop of fine fruit, and other growers report excellent prospects.

Grocers Start War On Fakirs in Trade.

The National Association of Retail Grocers, which has branches in many cities, has started a movement for the uncovering of alleged fraudulent retail business methods, especially in Philadelphia and in New York. The purpose of the movement is to take legal action against dealers for false representations in advertising in newspapers, catalogues or otherwise. The association, through the office of Secretary William Gray, of Brooklyn, has been at work collecting evidence against alleged offenders for months. In New York the dealers are being criminally prosecuted.

The matter was brought to the attention of the association through a suit brought by a customer against a New York department store, which sold to him for $10 a watch advertised to be worth $25. The purchaser took the watch to a jeweler, who declared that it could be bought at retail in any one of a half hundred stores for $3.50, and that the manufacturer's price was something like $1.75.

One of the first tests to be made by the association in this effort, it is asserted, will be on canned vegetables, probably tomatoes, where full "three-pound standards" are advertised and sold as such, and upon investigation are found to be "seconds" or "thirds" with the tins only about half full.—*Ex.*

Correspondence.

BALTIMORE, MD., July 9, 1906.

Tomatoes.—The situation here on tomatoes is practically unchanged. There is a very fair run of orders, most of them for small lots. The lack of confidence on the part of buyers is naturally having the effect of cutting down orders, but the encouraging feature of the situation is the fact that stocks in the hands of the trade are light. Quite a quantity of tomatoes will have to be bought between now and September 1. The Bankers' Committee for the "Syndicate" is holding price on No. 3 standard tomatoes very firmly at 95c. per dozen. There has been quite a healthy demand for future tomatoes this week. We are filling our orders on a basis of 55c. for No. 2 and 75c. per dozen for No. 3 standards. We can buy strictly first-class brands at these figures. From present indications, it looks as though the packers will be very heavily sold up on future tomatoes by the time the season gets well under way, and it will take an unusually large pack to enable them to fill their orders. In spite of the fact that there has already been so much business booked, there is still a very strong disposition to take hold. We are buying quite a quantity of gallon standard future tomatoes at $2.25 per dozen f. o. b. Baltimore. These are Virginia packed goods.

Beans.—The packing of string beans is going on in good shape.

Small Fruits.—The season on blackberries so far has not been very satisfactory. Reports from the country districts are full of complaints about the difficulty in getting labor, and the comparatively light arrivals in Baltimore seem to confirm these reports. The cost of raw material has been high. We can quote some country packed No. 2 standard blackberries at 60c. per dozen, less 1½% f. o. b. Baltimore. We can also quote country gallon standard blackberries at $2.90 per dozen f. o. b. Baltimore. The quantity of gallon blackberries packed will be limited. We call your special attention to No. 3 standards, which we can offer at 80c. per dozen. These look cheap.

Pineapple.—The season is about over here. The largest packers are as nearly bare of stocks, we believe, as they have ever been at this time of the year. Most of them are in a peculiar position, where they would rather figure on small than large orders.

Peas.—There is a very fair demand for peas. The high prices, of course, have had the effect of making buyers hold off awaiting developments in New York State and the West. It does not look as though there will be a sufficient surplus in those sections to materially alter the situation.

Sweet Potatoes.—The market is gradually getting into better shape. Most of the cheap lots are being cleaned up and a 75c. market seems a strong probability in the very near future.

THOMAS G. CRANWELL & CO.

BALTIMORE, MD , July 9, 1906.

Dear Sirs.—Nothing of special importance occurred this week in the tomato market. When the prices were again steadied, the conditions became normal and business in spot tomatoes was fairly active, while the demand for futures increased largely. The buying orders came from nearly all sections and the activity continued up to the close of the week. Until the new tomatoes are packed and ready for shipment, the buying of spot tomatoes will continue good because the stocks in jobbers' hands are very small, while the consumption is as large as usual at this time in the season. The increased demand for futures was caused by concessions made by a number of the packers who are willing to take a chance while their neighbors are thinking it over. The outlook is for a lively market in that article during the next three or four months.

Corn for both spot and future delivery has found many friends during the past month, and the buying increases as the season advances. Low-priced spot corn is a very good seller these days, and futures may look very cheap three months hence at today's prices, especially if the reports of a greatly decreased acreage prove true. New string beans are getting active at prices which are more attractive to the jobbers, and heavy buying was noted the last three days. The demand for peas was less than during the week previous, but the stocks held here are so small, comparatively, that the packers don't seem at all anxious about them. Sweet potatoes and spinach are very firm and fairly active.

The buying of future peaches reminds one of old times in this market when they formed the basis, possibly, of half the whole year's work in the canneries of this section. The past week was quite lively, especially in seconds and pie peaches, which can be shipped this month. The fine, luscious Maryland peach will occupy a very important place in the Baltimore canning business during the the remainder of the season. Berries, cherries and pineapples were quiet this week, but they will be wanted before the fall trade is satisfied, some of them being already closely sold up.

THOS. J. MEEHAN & CO.

If by using

my Flux you get only 5 per cent. increase in efficiency with your machines, it means a saving of over 100 per cent. in the cost of your flux, and it is the very best kind of economy.

BROWN, BOGGS CO., LTD., HAMILTON, ONT., Sole Agents for Canada.

Aberdeen (Md.) Market.

ABERDEEN, MD., July 9, 1906.

Spot Tomatoes.—Unlike last week, when prices of spot 3s tomatoes ebbed and flowed like the tides in the Bay of Fundy, we have to report this week a much steadier market condition and a much narrower range of prices. While a few restless sellers are still offering goods as low as 90c. f. o. b., it seems to be the general impression that the stocks obtainable at this figure are small and that any large blocks would have to be obtained at the prices quoted by the large holders. As is usual in a holiday week, attention has been given to less serious matters and business in consequence has been light in character.

Future Tomatoes.—With interest centered around conditions in the spot market and the Fourth of July celebrations, there is little change in the market today from that as reported last week. While the business for the week has not been as large as could have been desired, yet it has been all that could be expected with a holiday in midweek. With the large holdings of spot tomatoes in such hands as can financially well afford to hold them if they are so disposed, with the retailers' shelves bare of spot geods and the large buyers with few orders placed and packers fairly well supplied with future contract, an active market during packing season is very much within the range of possibility and should the market become active, 75c. for 3s standards may look cheap and desirable. The present price of futures will not yield under conditions governing this season, with the increased cost of raw stock and advanced price of cases and solder one whit more to the packer than at 67½c. last season and with the possibilities of the future, contracts made on the basis of present quotations may be by no means a bad bargain. For the reasons already stated, reliable packers are loath to accept future business at present quotations.

Spot Corn.—Corn continues to hold firm to previous quotations and is still firming in sympathy with the conditions governing the future market for this article.

Future Corn.—More and exceedingly heavy rains this week followed by cool weather, which is naturally detrimental to the growing corn crop, and, in consequence, still more packers have withdrawn prices pending developments.

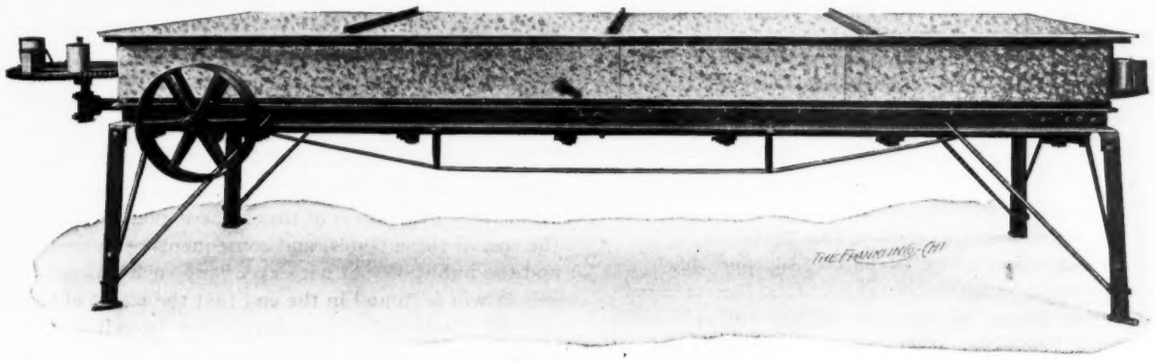
41 RIVER STREET. - - - CHICAGO.

THE HAWKINS UNIVERSAL EXHAUSTER



OPERATION

As shown by illustrations the cans are received in single line direct from Filler and fed into the machine automatically by the well-known Hawkins Disc Feed Mechanism and carried by intercommunicating revolving discs. The steam is supplied by curved pipes which conform to the lines of travel of the cans.

Will handle any shape can of any size up to and including gallons, without change.

SIMPLE, DURABLE, and cannot get out of order.

No chains to break or wear.

SIZES AND CAPACITY

This machine can be furnished any size and any capacity desired. The standard sizes are as follows, capacities mentioned being based on two minutes exhaust:

No.	*Capacity 3-lb. cans*	*Floor Space.*
8	45 per min.	5 x 11 feet
10	57 " "	5 x 13 "
12	68 " "	5 x 15 "
14	80 " "	5 x 17 "
16	91 " "	5 x 19 "

Superior to all other mechanism used for Exhausting Cans.

Its efficiency has been thoroughly demonstrated in actual packing.

BALTIMORE, FRIDAY, JULY 13, 1906.

SIZES OF CANS AND WEIGHT OF CONTENTS.

It is true that Congress has passed the Pure Food Bill by a large majority, and that it will go into operation the first day of next year, 1907, but it is also true that its passage through Congress has been the cause of the development of a large amount of discussion relative to suggestions and complaints in respect to pure foods, canned goods especially. It undoubtedly woke the country up to many affairs that should be of consequence and attracted attention to matters that it would be well for food preparers and preservers of all kinds to study.

There is no question but that any business of food preserving and preparing will in the course of a great many years develop objectionable features, and it may be well for the people to become publicly aware that such things are developing, that action may be taken to restrain or prevent them. Therefore, it is the duty of every friend of the canned goods industry to consider without prejudice all the accusations that appeared before Congress, to investigate them without fear, favor or denial and to form a correct judgment of the truth, or otherwise, of these accusations.

It must be always remembered that competition, that ever pervading influence, which is tending to take the trade of competitors by means of lower prices, is tending also to introduce methods into business that are not justifiable. Let us then look at this question from the point of the desire to do that which is right and see if the canned goods packer has the right to cry "peccavi."

Perhaps the two strongest points made in the congressional discussion, at least in respect to canned goods, were in regard to the size of the can and the question of requiring the weight of the contents upon the label. It was asserted in Congress that both of these things were impracticable; that the size of the cans naturally was produced by the condition of the market; but this is not true in the essence of the question itself. The sizes of cans as used by canned goods packers in general are now the result of the efforts of canmakers producing these vessels in immense quantities and according to specific sizes, and selling them at an almost profitless price. The value of tin cans is kept down by competition so low that neither national nor State legislation could directly reduce values. The original tin, which is merely in the sheets a question of coating sheet iron or sheet steel with a thin coating of pure metal tin and producing said sheets to sizes that will cut into forms for can bodies with the least possible waste; these are sold by competing manufacturers to the great canmaking companies by the box of a set size at so much per box, and the only question in regard to "tin plates," as they are called, is in respect to the thickness of the coating of tin upon them. The heavier the coating of tin the more costly the plate. This is a matter which could easily be regulated by law, but there is one thing that Congress cannot do—it cannot require an increased thickness of tin on these plates without increasing the cost of these plates, and consequently the cost of the cans, and the public should not expect any such proceeding.

It will be found in the end that the result of the Pure Food Bill and the investigations developing from it that prices of all kinds of foods will be somewhat enhanced; such must naturally be the result, as wherever competition is compelled to forego its cheap and unsanitary methods prices will naturally rise. All kinds of vessels for containing such foods will probably be nnhanced somewhat in value, and we are alluding to this merely in respect to the question of the vessels that will contain them.

There is one direction in which national legislation might have done some good in respect to the can. One of the leading members of the Exchange at the time of the discussion to which we have alluded made the suggestion that it would be to the advantage of the canned goods business if the size of the can were fixed by law to correspond with that of the liquid measure used throughout the country. Thus, instead of calling them one, two or three pound cans, to require them to conform to the size of the legal pint, quart and half-gallon measures of the law standard. No action was taken upon this proposition at the time. The revolution in the manufacture of the can was then developing; it has since entirely taken such manufacture out of the hands of the canned goods packers and centered their production in the hands of great systems and concerns, which supply all canners with whatever sized cans they want according to contract or order. We know of no special sizes of cans being made for any one cannery or for any one section, nor are there likely to be, and, as nothing was done by any authority in regard to the proposition to make legal measures the standard sizes of cans, the business will probably go on as it has been going for a great many years, governed in respect to the sizes by the wisdom of the canmaker.

There comes, also, the second question of the two important points made before Congress—the proposition to require every packer of canned goods to put the weight of the contents of each can upon the label. This question has more than once in years past aroused the indignation of canned goods packers. Many of the States have passed laws relating to canned goods, and a number of them have either made laws including this requirement, or have proposed to do so. The packers have invariably opposed it as impracticable. As a rule, canned goods packers assert that it cannot be done. The oldest houses and most respectable firms assert that it cannot be done, and yet we have reason to believe they are speaking in error.

If ever such action is taken in any law, it will have to be very considerately worded, because, while it may be possible to do such a thing as that, it certainly will not be easily accomplished. This very question was raised in the Canned Goods Exchange of Baltimore fifteen or twenty years ago and earn-

estly discussed. We remember that some of the most reputable houses in this city who have great reputations, are intrinsically honest, and wish for honesty in all trade movements, denied that this could be done, and in the Exchange they bitterly opposed the proposition to ask the State of Maryland to require the net weight of the contents to be placed or rather stamped upon every can of cove oysters. Long and earnestly the Exchange debated it, but finally resolved to ask the State of Maryland for such a law in respect to oysters, the purpose being to prevent competition from cutting the weight of oysters the way it was doing. The result of the Exchange's action was that the Maryland Legislature passed a bill aocording to the nature of the request made by the Exchange, and it remained a law until about one year ago. It only then ceased to operate because it was omitted by error in recodifying the Maryland laws.

The important point of this matter is that, despite the honest belief and antagonism of some of the very best firms in this city and the oldest houses in the business, it was proven by the practice of many years that it could be done, at least in respect to cove oysters, and it was found that it was an advantage in the selling of these goods.

In the face of such evidence, we will not assume the position that it cannot be done, although there may be many classes of foods in which it would be impossible to secure accurate results.

The New Pure Food Law

As Passed by the Senate, Amended in the House and Passed, And Finally Agreed Upon and Accepted by the Senate—In Effect January 1, 1907.

(CONTINUED FROM LAST WEEK.)

Second. If the contents of the package as originally put up shall have been removed, in whole or in part, and other contents shall have been placed in such package, or if the package fail to bear a statement on the label of the quantity or proportion of any alcohol, morphine, opium, cocaine, heroin, alpha or beta eucane, chloroform, cannabis indica, chloral hydrate, or acetanilide, or any derivation or preparation of any such substances contained therein. Provided, however, That it may be proven as a complete defense to any accusation or prosecution for failure to state the quantity or proportion of alcohol as above required, that the quantity or proportion of alcohol contained in any package does not exceed the quantity or proportion prescribed by the United States Pharmacopœia or the National Formulary as a solvent or preservative of the active necessary constituents of the medicine or preparation in such package.

In the case of foods:

First. If it be an imitation of or offered for sale under the distinctive name of another article.

Second. If it be labeled or branded so as to deceive or mislead the purchaser, or purport to be a foreign product when not so, or, if the contents of the package as originally put up shall have been removed in whole or in part and other contents shall have been placed in such package, or, if it fail to bear a statement upon the label of the quantity or proportion of any morphine, opium, cocaine, heroin, alpha or beta eucane, chloroform, cannabis indica, chloral hydrate, or acetanilide, or any derivative or preparation of any of such substances contained therein.

Third. If in package form, and the contents are stated in terms of weight or measure, they are not plainly and correctly stated on the outside of the package.

Fourth. If the package containing it or its label shall bear any statement, design, or device regarding the ingredients or the substances contained therein, which statement, design or device shall be false or misleading in any particular. Provided, That an article of food which does not contain any added poisonous or deleterious ingredients shall not be deemed to be adulterated or misbranded in the following cases:

First, In the case of mixtures or compounds which may be now or from time to time hereafter known as articles of food, under their own distinctive names, and not an imitation of or offered for sale under the distinctive name of another article, if the name be accompanied on the same label or brand with a statement of the place where said article has been manufactured or produced.

Second. In the case of articles labeled, branded or tagged so as to plainly indicate that they are compounds, imitations or blends. Provided, That the term blend as used herein shall be construed to mean a mixture of like substances, not excluding harmless coloring or flavoring ingredients. And provided further, That nothing in this Act shall be construed as requiring or compelling proprietors or manufacturers of proprietary foods which contain no unwholesome added ingredient to disclose their trade formulas' except in so far as the provisions of this Act may require to secure freedom from adulteration or misbranding,

SEC. 8. That no dealer shall be convicted under the provisions of this Act when he is able to prove a guaranty of conformity with the provisions of this Act in form approved by the rules and regulations herein provided for, signed by the manufacturer or the party or parties from whom he purchased said articles. Provided, That said guarantor resides within the United States. Said guaranty shall contain the full name and address of the guarantor making the sale to the dealer, and said guarantor shall be amenable to the prosecutions, fines and other penalties which would otherwise attach in due course to the dealer under the provisions of this Act.

SEC. 9. That for the purpose of carrying out the provisions of this Act it shall be the duty of the Secretary of Agriculture, from time to time, to determine and make known standards of the various articles of food, in compliance with the definitions and provisions of this Act, for the guidance of the officials charged with the administration of food laws and for the information of the courts, and to determine the wholesomeness or unwholesomeness of preservatives and other substances which are or may be added to foods; and to aid him in reaching just decisions in such matters he is authorized to call upon the committee on food standards of the Association of Official Agricultural Chemists and the committee of standards of the Association of State Dairy and Food Depatments and such other experts as he may deem necessary. And upon request made to the Secretary of Agriculture prior or subsequent to reaching any decision as provided for in this section, by any manufacturer or other person interested, asking for the appointment of a board to determine the wholesomeness or unwholesomeness of any preservative or other substance which is or may be added to foods, and concerning the use of which the person making the request has an interest, it shall be the duty of the Secretary of Agriculture, for the purpose of aiding him in determining as to the wholesomeness or unwholeness of any such preservative or substance, to appoint a board of disinterested experts, which board shall consist of five members, one of whom shall be an expert toxicologist, one an expert physiological chemist, one an expert bacteriologist, one an expert pathologist and one an expert pharmacologist, which board shall meet at the city of Washington, District of Columbia, or elsewhere, at the call of the Secretary of Agriculture, and pass upon such question after proper notice and hearing granted to the person making such request. The compensation of the members of such board shall be fixed by the Secretary of Agriculture. Foods complying with the standards fixed by the Secretary of Agriculture, as provided in this section, may bear upon the label the inscription "United States Standard," but such inscription, or words of similar import, shall not be used as descriptive of any article of food which does not comply with the standard so fixed, under penalty of being deemed misbranned under the provisions of this Act.

SEC. 10. That every person who manufactures or produces for shipment and delivers for transportation within the District of Columbia or any Territory, or who manufactures or produces for shipment or delivers for

SEC. 11. That any manufacturer, producer or dealer who refuses to comply, upon demand, with the requirements of section 10 of this Act shall be guilty of a misdemeanor, and upon conviction shall be fined not exceeding one hundred dollars, or imprisoned not exceeding one hundred days, or both. And any person found guilty of manufacturing or offering for sale, or selling, an adulterated or misbranded article of food or drug in violation of the provisions of this Act may, in the discretion of the court, be adjudged to pay, in addition to the penalties hereinbefore provided for, all the necessary costs and expenses incurred in inspecting and analyzing such adulterated articles which said person may have been found guilty of manufacturing, selling or offering for sale.

SEC. 12. That this Act shall not be construed to interfere with commerce wholly internal in any State, nor with the exercise of their police powers by the several States; but foods and drugs fully complying with all the provisions of this Act shall not be interfered with by the authorities of the several States when transported from one State to another so long as they remain in original unbroken packages, except as may be otherwise defined by law or provided by statutes of the United States. Provided, That nothing in this Act shall be construed as repealing, modifying or changing chapter 728 of the Act of Congress approved August 8, 1890.

SEC. 13. That any article of food or drug that is adulterated or misbranded within the meaning of this Act and is transported or being transported from one State to another for sale, or if it be sold or offered for sale in the District of Columbia or any Territory of the United States, or if it be imported from a foreign country for sale, or if intended for export to a foreign country, shall be liable to be proceeded against in any district court of the United States, within the district where the same is found, and seized by a process of libel for condemnation. And if such article is condemned as being adulterated or misbranded, within the meaning of this Act, the same shall be disposed of as the said court may direct, and the proceeds thereof, if sold, less the legal costs and charges, shall be paid into the Treasury of the United States, but such goods shall not be sold in any State contrary to the laws of that State. The proceedings of such libel cases shall conform as near as may be to proceedings in admiralty, except that either party may demand trial by jury of any issue of fact joined in such case, and all such proceedings shall be at the suit and in the name of the United States.

SEC. 14. The Secretary of the Treasury shall deliver to the Secretary of Agriculture, upon his request from time to time, samples of foods and drugs which are imported into the United States, or offered for import, giving notice thereof to the owner or consignee, who may appear before the Secretary of Agriculture and have the right to introduce testimony, and if it appear from the examination of such samples that any article of food or drug offered to be imported into the United States is adulterated or misbranded within the meaning of this Act, or is otherwise dangerous to the health of the people of the United States, or is of a kind forbidden entry into, or forbidden to be sold or restricted in sale in the country in which it is made or from which it is exported, or is otherwise falsely labeled in any respect, the said article shall be refuse admission, and the Secretary of the Treasury shall refuse delivery to the consignee and shall cause the destruction of any goods rerused delivery which shall not be exported by the consignee within three months from the date of notice of such refusal under such regulations as the Secretary of the Treasury may prescribe. Provided, That the Secretary of the Treasury may deliver to the consignee such goods pending examination and decision in the matter on execution of a penal bond for the amount of the full invoice value of such goods, together with the duty thereon, and on refusal to return such goods for any cause to the custody of the Secretary of the Treasury, when demanded, for the purpose of excluding them from the country, or for any other purpose, said consignee shall forfeit the full amount of the bond. And provided further, That all charges for storage, cartage and labor on goods which are refused admission or delivery shall be paid by the owner or consignee, and in default of such payment shall constitute a lien against any future importation made by such owner or consignee.

SEC. 15. That the term "territory" as used in this Act shall include the insular possessions of the United States. The word "person" as used in this Act shall be construed to impart both the plural and the singular, as the case demands, and shall include corporations, companies, societies and associations. When construing and enforcing the provisions of this Act, the act, omission or failure of any officer, agent or other person acting for or employed by any corporation, company, society or association, within the scope of his employment or office, shall in every case be also deemed to be the act, omission or failure of such corporation, company, society or association as well as that of the person

SEC. 16. That this Act shall be in force and effect from and after its passage. Provided, however, that no penalties herein named for misbranding shall be imposed until after the expiration of eighteen months from the passage of the Act, except the penalties provided in section fourteen.

Amend the title so as to read:

An Act for preventing the adulteration or misbranding of foods or drugs and for regulating traffic therein and for other purposes.

Passed the Senate Febrnary 21, 1906.

Attest: CHARLES G. BENNETT, *Secretary.*

Passed the House of Representatives June 25, 1906.

Attest: A. MCDOWELL, *Clerk*

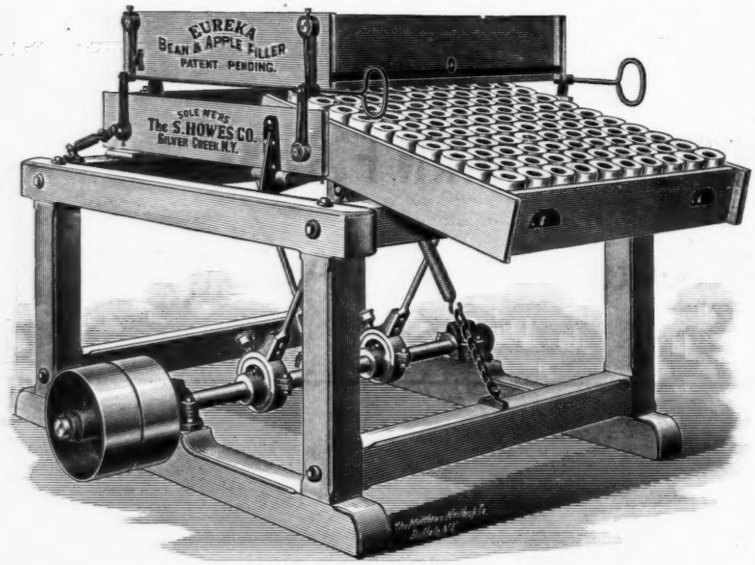
Signed by the President.

EUREKA

THE "EUREKA" CAN FILLER.

EUREKA

The Simplest and easiest operated machine on the market.



It will fill a tray of cans quicker and more uniformly than by any other means.

It will handle your goods with perfect satisfaction.

With it, one man can do more and better work than can be performed by thirty women.

It is the strongest and best built machine, with no complicated parts to get out of order.

It will pay for itself as quick as any other machine in the factory.

Have you our late complete catalogue? Better write for it today and secure our prices.

THE S. HOWES COMPANY,

Eureka Works Silver Creek, N. Y.

A COMPLETE COURSE IN CANNING

The book that should be in every cannery. Full and complete Practictal Working Formulæ for the packing of every article in the food line. Every formula is a tried and proven success—no experiments. : : : : : : : :

IMPROVE YOUR PACK

BE SURE YOU ARE RIGHT

And this you can do if you have this book to consult. It may save you thousands of dollars in one season. And yet the price is but $5.

CAPS SYRUP GOODS WITHOUT SCORCHING

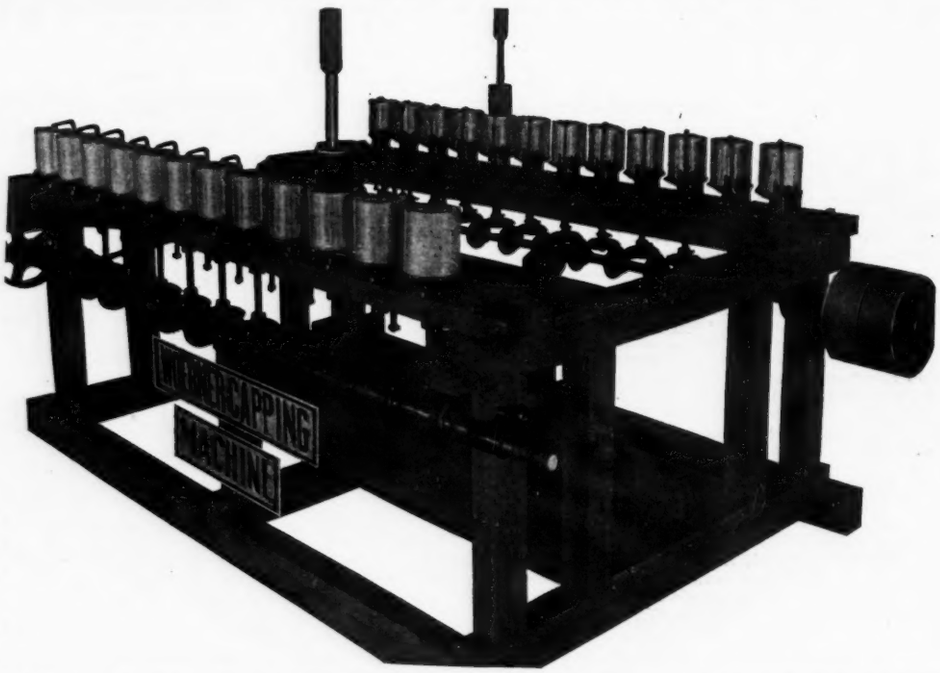
We have been told by different canners and workmen of large experience that our capper

BEATS ANY OF THE HIGH PRICED CAPPERS 40 DIFFERENT WAYS.

It will do work that no other capper will do—that is Cap Syrup goods without trouble or scorching; also, tall cans and No. 1, No. 2, No. 2½ and Standard, without any adjustment

NO FACTORY LARGE OR SMALL IS COMPLETE WITHOUT IT.

The canner who now packs from 10,000 to 15,000 cans per day, or less, by hand, can save the cost of this Capper in one season. Make no mistake—Labor is getting scarce and more independent every day, and you must overcome it by doing with less labor.



WE CAN PROVE OUR WAY OF CAPPING IS THE CHEAPEST, surest and best way, excepting none. We have the best and stand ready to prove it.

If anyone buying a capper this winter, will send us the top of a can, we will have a pair of steels made free of charge, send a man to start the capper and give all necessary points. Do not delay.

DAVID C. WOERNER, Liverpool, N. Y.

A Model Canning Factory

The plant shown is one of the most complete and perfectly appointed in the country. Under

THE HASTINGS SYSTEM

it cost less than if the owners had undertaken their own contracting. We saved them money and gave them a better, more practical and more economical plant to operate.

We Build Everything for the Fruit and Vegetable packing business. We constantly employ expert engineers, architects and superintendents.

Our Experience is Your Safeguard. Our line of machinery is complete, including Automatic Corn and Tomato Fillers, Power Capping Machinery, Horizontal, Open and Closed Retorts, Traveling Hoists, etc., Engines, Boilers, Pipe, Fittings, Belting and other general equipment —all modern and efficient in every respect.

Refitting for Profit—If your factory expense is eating up your profits, write us. We can turn the flow of money the other way. Address

TIN PLATE TALKS.

DO YOU REALIZE?

That to the public mind, most all the "taint talk" about canned goods originates with the idea that the tin plates used in the manufacture of cans will poison. This is sometimes wrong, but when our

"CLEAN and BRIGHT"
Plates are used IT'S IMPOSSIBLE.

WHY NOT USE THEM AND DO AWAY WITH TROUBLE?

PROMPTNESS

in making Deliveries is one thing for which the Wheeling Can Co. is famous.

For the season of 1906 we will have a largely increased capacity and greater storage facilities, and will be in a position to take care of and furnish promptly any contracts we may undertake, and we trust that the trade will communicate with us and inquire into our facilities for furnishing them good Cans and making prompt shipment before placing their contract.

Our Word Backed Up

We offer the trade the following testimonial letter which we trust will convince them that we are able to furnish cans that are as nearly perfect as it is possible to make and that we are at all times in position to make prompt and quick shipments.

Eureka, Ill., Nov. 15, 1905.

Wheeling Can Co., Wheeling, W. Va.

Gentlemen:—Answering your favor of the 13th inst., we beg to state that our season's business with you has been most satisfactory. We have bought something over two million 2 lb. and 5 or 6 cars of 3 lb. cans and we have not had the slightest complaint of any nature to make on any shipment. As a season's supply of cans, they were the best that we ever used.

Your shipments have been prompt whenever requested and your attention to all of our orders and reqests has been all that we could possibly ask.

Yours very truly,
DICKINSON & CO.

Wheeling Can Company,

OLIVER J. JOHNSON, President.

Every Practical Canner

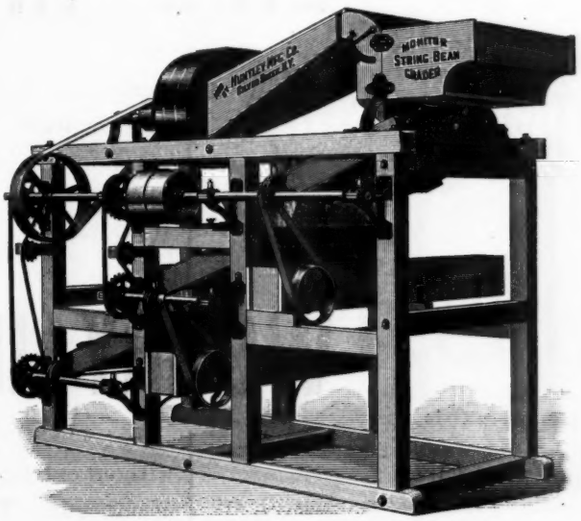
Will immediately recognize the superior merits of these three MONITORS, selected from the well-known MONITOR CANNERS' LINE. These three machines pictured here, if installed in your factory will materially assist you in having the best bean pack in the history of your plant; uniform grade, the coarse grades cut to the greatest advantage, and the cans filled uniformly and rapidly. Read what the users say about these machines.

MONITOR STRING BEAN GRADER.

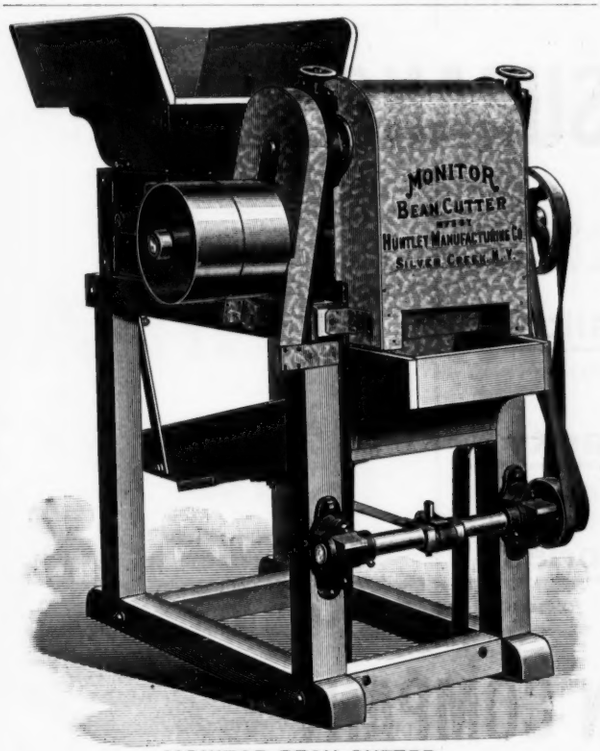
CAZENOVIA, N. Y., DEC. 12.

GENTLEMEN:—Replying to your letter of Dec. 11, I will say that we are using one of your Monitor String Bean Graders and we are well satisfied with the work it does, it has almost unlimited capacity. The beans are more evenly graded than with any other machine we have used. We are also using one of your Monitor Bean Fillers, Pea Graders and Cleaners which are giving entire satisfaction. We have been able to do our work better with these machines than with any we have ever tried. Very truly yours,

THE CAZENOVIA CANNING CO.



MONITOR STRING BEAN GRADER.



MONITOR BEAN CUTTER.

MONITOR BEAN CUTTER.

The Monitor String Bean Cutter is the neatest and most desirable device for the purpose for which it is made, on the market and no factory should be without one. For cutting coarse grades of string beans and the larger grades of butter beans, it has no superior. It operates positively and turns out the beans cut to uniform lengths and is capable of caring for an almost unlimited amount of this quality of stock.

MONITOR CAN FILLER.

EVANSVILLE, IND., JULY 8.

GENTLEMEN:—We have bought a great many machines since we have been in the canning business, some of them were very satisfactory, but none have pleased us from the very first trial as your Bean Filler has done. When we first placed our order we had our doubts about it working satisfactory. There no longer exists any doubt, for we are very much pleased with the machine.

Yours truly, INDIANA CANNING CO., EZRA LONG, SECY.
